Audio Visual

Welcome to the latest **Cool4School** guide, a round-up of all the newest technologies and innovations perfectly suited to the education market. From classrooms to staffrooms, this guide will highlight how all aspects of the education environment can benefit from technology solutions.

Technology plays a central role in education and has become integral to the modern learning process. Whether it's being used to increase student engagement, to help teach more effectively or to aid day-to-day administration, technology can improve school operations across the board.

Technology provides new and exciting ways to bring lessons to life: interactivity, through tablet PCs, interactive whiteboards, digital screens, visualisers and projectors, benefits both teacher and student by creating a more engaging way to learn.

For larger rooms such as assembly halls and lecture theatres, audio and microphone products, cameras, digital signage and projectors can create a fully integrated system ideal for large-scale communication.

Out of the classroom, educational establishments are businesses like any other and must run effective operations to cut costs, save time and increase productivity.

There's a wide-range of office-based technology available, including multi-function printers, scanners and barcode readers, that helps provide a more streamlined service to students, staff and visitors.

A school must also create a safe and secure environment. Take a look at the range of security solutions, ID card printers and sound systems that can help to keep a campus under control.

Cool4School Contents Guide

Ultra-portable short-throw projector

The PJWX4130 brings cutting edge projector technology to the smallest spaces. It can be used to display images of up to 80 inches in reception areas where there is a wall or flat surface to project upon. Ideal for welcoming visitors to reception.

RICOH

Product: PJWX4130N

All-in-one security system

Monitor school receptions and entry/exit points with this comprehensive, easy to install security package including 22" LCD with built in 8 channel 500GB DVR plus 4 internal/external cameras with IR night vision.

Product: SME-4220

SAMSUNG

Visitor ID on demand

This compact, easy-to-use, cost-effective desktop direct thermal label printer can produce visitor or contractor's ID badges on demand at the touch of a button.

Product: PC23d series

Intermec

Main office voice evacuation system

Perfect for messages that need to be communicated around the school in an instant. The system offers max 4 mic/line inputs, 2 BGM inputs, max 60 assignable speaker zone outputs and Intuitive configuration.

Product: VVM-3000 series

TOA

Reception

As the gateway of the school, the reception must have a robust security solution; CCTV coupled with printers and scanners for on-demand photo ID cards will monitor activity and keep track of who enters and exits the building. The reception is also the centre for school-wide communications; relay information through an intercom and evacuation system and direct visitors with interactive digital signage.

Co4 Welcoming

Bringing interactivity to digital signage

The 550LST touch display is more than a media player and more than a consumer display. Visitors to education environments can interactively find what room they are going to with increased information possibilities.

Product: E505459

elo TOUCH SOLUTIONS

Assemble videowalls with ease

Award-winning mounting solution that is ready to install straight out of the box. Universal mounting pattern, 8 points of tool-less micro adjustment and custom screen spacers to perfectly position each mount.

Product: DS-VW765LAND

peerless-AV

Captivate visitors and students alike

Reach out with emergency bulletins, class notices, interactive registration and event promotions. Schools and universities will be able to impress prospective students, parents and visitors with a progressive, technology-forward school environment.

SAMSUNG **NEC** **SHARP** **PHILIPS** **Panasonic** Ideas for life **LG** Life's Good

Flexible display combination

When paired with a suitable Samsung LED display, this is the ideal solution in reception environments, making displays networkable and enabling them to run MagicInfo digital signage software and Windows embedded operating software.

Product: SBB-D16AX2/EN

+ LH55MEBPLGC/EN

SAMSUNG

Elegance with minimum power consumption

This 24-inch LED monitor has high contrast, great lightness and minimum power consumption. The thinner and elegant design of this monitor makes it an ideal monitor to fit into administration applications in schools.

Product: LS24B350BS/EN

SAMSUNG

Avoid time away

Teaching professionals can find it hard to have time off for meetings or conferences. Video conferencing offers face-to-face communication without the need to leave your premises, saving substantial costs on travel and logistics.

Product: 55111-00006

RADVISION
an Avaya company

IP network intercom systems

Flexible communications for up to 3,072 stations on existing corporate local and wide area data networks. Calls can be controlled and monitored. This is the ideal solution in the event of emergency evacuations.

Product: N-8000 series

TOA

Kick start meetings with a coffee

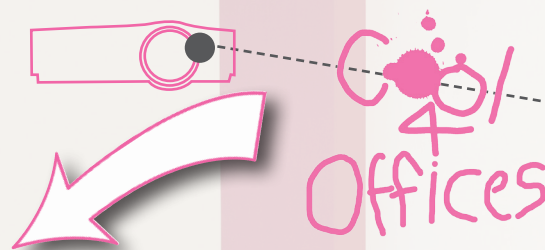

Make a great first impression with this stylish fast brew coffee machine which makes 12 cups of coffee in 10 minutes and thermostatic plate to heat milk and keep coffee at a constant temperature.

Product: 47087

morphy richards
more innovative

Administration

Unsung heroes of the school's day-to-day operations, the school administrators can benefit from a range of technology such as multi-function printers, state-of-the art communications, scanners that digitise paper documents and even a cracking cup of coffee! Investing in the right technology in this environment can help administrators cut costs, save time and streamline procedures.

Longer life and less maintenance

An intuitive way to display charts, information or images from your iPhone or tablet – with LED+ technology that embraces a greener planet. No lamp replacement costs and a five-year education warranty give you peace of mind and low running costs.

Product: ZW212ST

Optoma

Superb images with 8x zoom

Combining sleek IXUS styling with simple point and shoot operation, the 16MP IXUS 132 offers superb quality images and fun, creative modes perfect for large-scale printouts, plus 8x optical zoom with Intelligent IS and HD movie settings.

Product: 8600B006AA

Canon

Colour duplex A4 scanner

With this feature-packed, powerful tool, scanning has never been easier. Kodak's ability to scan up to 60ppm at 300dpi, combined with an integrated flatbed, makes this efficient solution ideal for schools that need to scan books, passports and other bound documents as well as sheet-fed documents.

Product: 1140219

Kodak

Versatile printing and streamlined workflow

This A4 colour laser multifunction offers 3-in-1 versatility to ensure and efficient office print workflow. With print, copy and scan functionality the CLX6260ND offers the flexibility to work with less barriers.

Product: CLX-6260ND/SEE

SAMSUNG

Secure projector ceiling mount

Heavy duty ceiling mount, suitable for projectors up to 25kg. Unique carousel mount for simple installation, with only 124mm drop to top of projector when fitted flush to classroom ceilings.

Product: BT899/B

Made to perform for the classroom

Designed with the classroom environment in mind, the UM280's ultra-short-throw capability results in low shadow and glare - giving teachers more space to engage with students and the possibility to enhance the experience further when using an interactive whiteboard. Interactive version also available.

Product: 60003391

Affordable 80-inch TV

This large scale TV creates a centre point learning hub with Timeshift+ function to paused programs, Aquos Net + internet access and 4 x HDMI inputs.

Product: LC80LE646E

TOA's education microphone system

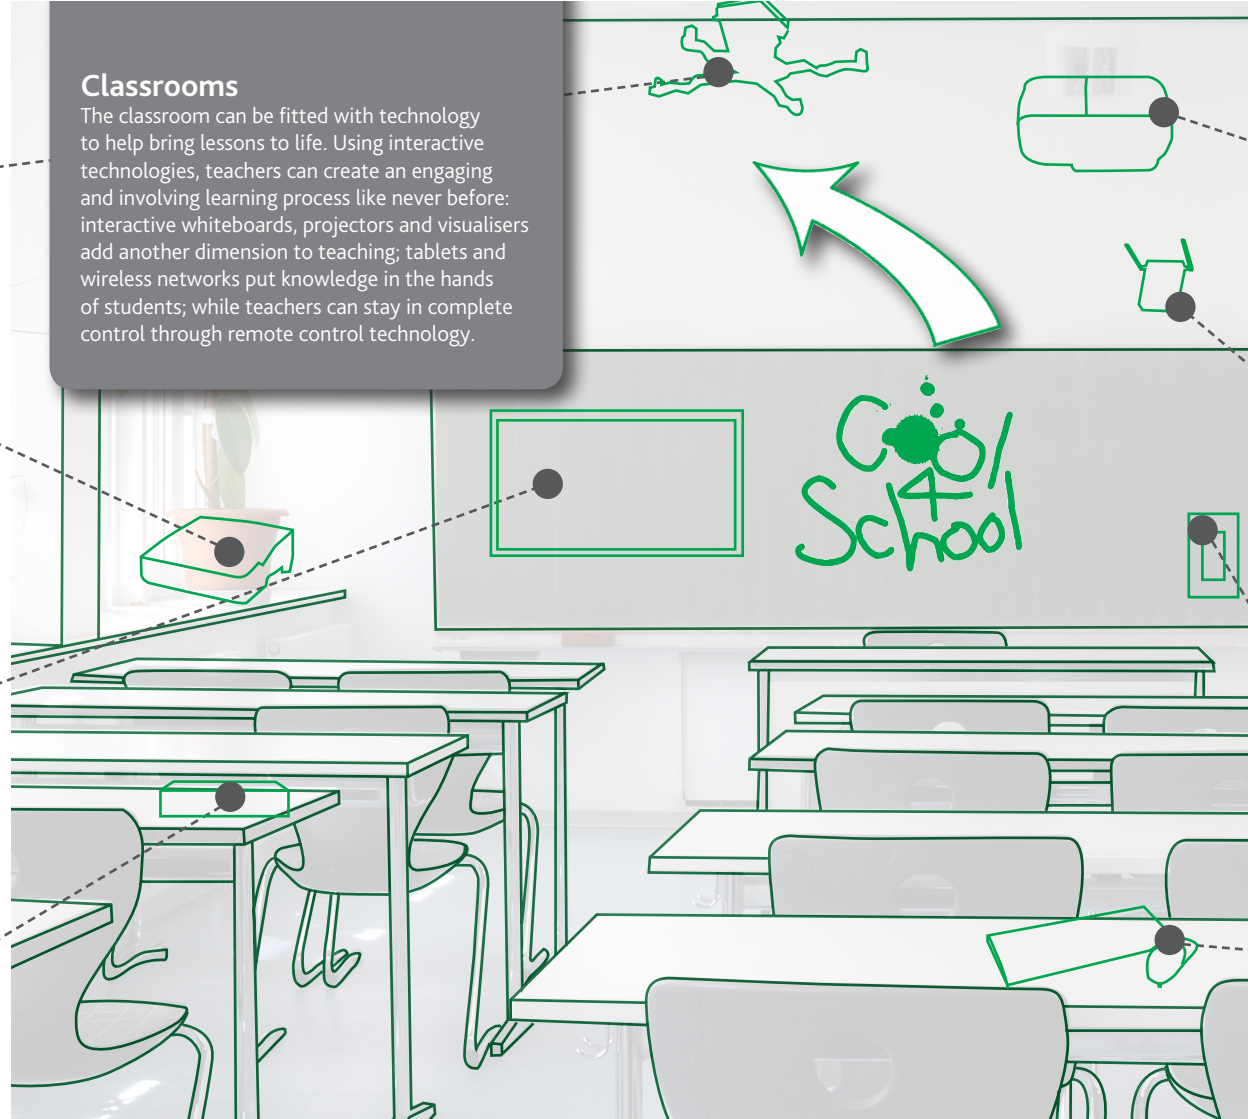

Enrich students' learning experience with remarkably clear, easily audible classroom communication. TOA's education microphone system offers convenience and clear interference-free infrared voice transmission that will bring classrooms to life.

Product: IR-802KIT4

Classrooms

The classroom can be fitted with technology to help bring lessons to life. Using interactive technologies, teachers can create an engaging and involving learning process like never before: interactive whiteboards, projectors and visualisers add another dimension to teaching; tablets and wireless networks put knowledge in the hands of students; while teachers can stay in complete control through remote control technology.

Interactive projector and visualiser

The first Epson interactive projector to feature two digital pens, allowing teachers and students to work together at the same time. Don't forget to add the NEW desktop visualiser. The ELPDC20 is the ideal visualiser for teachers looking to enrich lessons with high-quality images

Product: V11H453041DC V12H500052

Wireless security for multiple buildings

Achieve high speed, local network and internet connection in every classroom without the need for wiring. Ideal for multi-building sites and larger campuses.

Product: SILMESHCI-INT

SILVERNET

Taking control

Pixie offers intuitive control of virtually any display system with a remote control, be it a video projector, plasma screen or LCD Monitor. Controls power, volume and switches between up to 4 inputs making it ideal in a classroom environment.

Product: PXE-DCM+EURO

Air Mouse gives teacher freedom

Gives teachers the freedom to control PCs or Macs from anywhere in the classroom. No strings, no wires, no tricks, no gimmicks - just better technology that allows a more comfortable and versatile mouse to operate in the air or on the desk.

Product: GYM1100CKUK

Clear theatre-round viewing

Using both products together, you can film the podium and display the lecture on screens positioned around the theatre, ensuring everyone can see the presentation.

Product: GCH-K0305B & GTH-K0010M

GRUNDIG

Manoeuvrability in the classroom

A navigator brings freedom to control from anywhere in the classroom with dedicated remote controls for a PC or Mac. The green laser pointer works at distances of up to 100 feet, with easy set-up courtesy of Auto RF protocols.

Product: VP4450

SMK

Improve video quality

The Atlona LINE PRO range is fantastic product for switching and upgrading existing video products to full 1080p HDMI, bringing high definition sharpness and visual clarity to any lecture or presentation.

Product: AT-LINE-PRO5-GEN2

ATLONA
Connecting technology to your world

Networking simplified

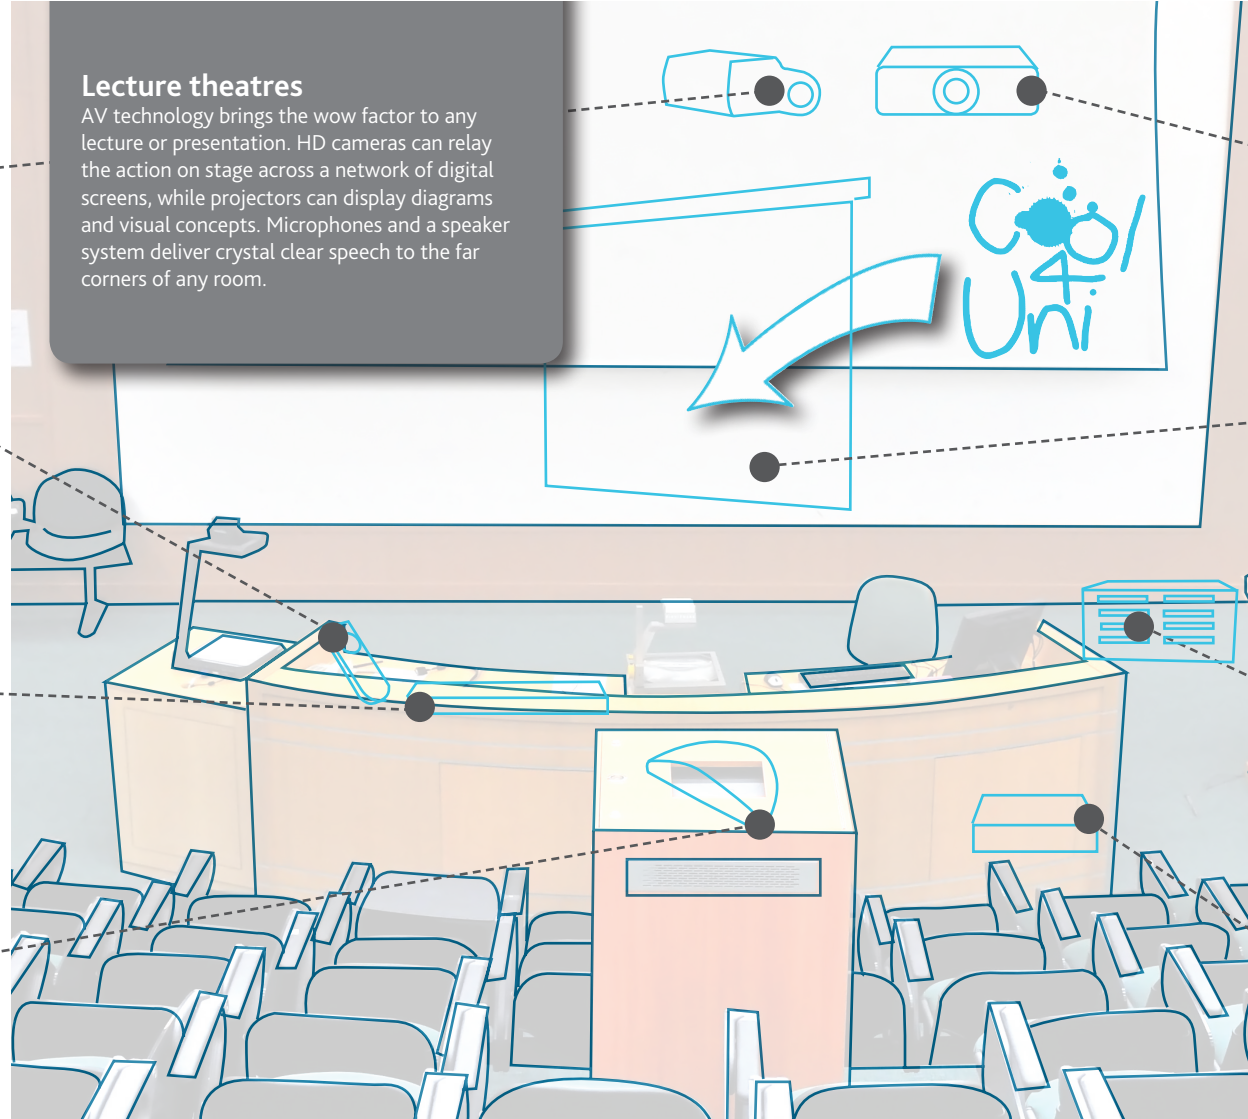

The Pixie Pro Networked Room Controller (NRC) functions as an independent, web-enabled controller for any display device. With a robust Ethernet interface, it makes configuring, controlling and monitoring equipment on your network easy.

Product: PX2-NRC-1142

Lecture theatres

AV technology brings the wow factor to any lecture or presentation. HD cameras can relay the action on stage across a network of digital screens, while projectors can display diagrams and visual concepts. Microphones and a speaker system deliver crystal clear speech to the far corners of any room.

Enhanced system flexibility

Panasonic PT-DZ680 DLP projectors feature a dual-lamp system and are compact but powerful. The RGB booster ensures vivid, colourful images and the original Eco Filter eliminates the need for filter replacement for up to 12,000 hours. All these features mean it's an ideal solution for education.

Product: PT-DZ680 series

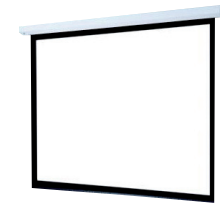

Panasonic
ideas for life

Viewing experience and engagement

It's important to see the bigger picture and there is no better way of conveying that information than with a quality projector screen. Available with either manual or electric operation for ease of use, screen sizes in excess of 3 metres wide are available.

somfy. Optoma SL ELECTRONICS WRAPCOR DALI-LITE

Wireless communication solution

These unique, compact, turnkey packages benefit from all the advantages of the Trantec S5 wireless systems. Able to run 12 channels simultaneously and with simple programming of transmitters, this is the ideal solution for education theatres.

Professional recordings made easy

Effortlessly captures pristine, better-than-CD quality sound as linear PCM recording by teaming up two internal 90-degree directional stereo microphones with a third omnidirectional centre TRESMIC. Enhance your tracks with high-powered functions specifically developed for musicians.

Product: V409131TE000

OLYMPUS

Technology plays a large part in today's music and we can supply a wide range of audio equipment that will enhance any school's music room. The equipment featured on these pages, when used with a PC or laptop, can be combined to record and playback compositions with high quality and ease of use – improving the experience for teachers and students alike.

The Sennheiser E835S dynamic microphone is a good, solid all-rounder designed to pick-up vocals and avoid feedback. Positioned securely in a quality Skytronic SKY180.041 microphone stand the Sennheiser is mated with the multi-featured Yamaha YAMMG166CUSB audio mixer. This mixer has 16 inputs for a variety of audio sources, plus it has the added feature of a USB interface allowing direct connectivity to a laptop, tablet or PC for direct, realtime recording.

The mixer is also shipped with a copy of Cubase A14 recording software, turning your music room into a mini-recording studio. Listen to the audio playback either in privacy via a Behringer BEHAMP800 Headphone Amp and Sennheiser HD205II closed back-headphones or fill the room with sound courtesy of Yamaha MS101 studio speakers.

Finally, to add the professional touch, improve the acoustics of the music room with the use of the Primacoustic London 8 acoustic treatment starter kit.

Music rooms

Technology is at the core of most modern music but, whatever the genre, students and teachers can benefit from today's equipment. Mixer desks bring a professional level of control to any production and a wide range of wireless microphones and headphones ensure that students can exploit their creativity without the health and safety risk of cables and wiring.

User-friendly ergonomic adjustments

The SmartErgoBase is a monitor base that delivers ergonomic display comfort and provides cable management. The user-friendly height, swivel, tilt and rotation angle adjustments allow the monitor to be positioned for maximum comfort for teacher and student sessions in the library.

PHILIPS

Product: 220S4LCB/00

Monitor book lending efficiently

Track movement of books in and out of the library by directly scanning the ISBN number printed on each edition. Also reads QR codes, a feature which is commonly found on recent books and gives students quick access to book details and reviews.

Product: 1400G2D-ZUSB-1

Honeywell

Add a new dimension to learning with 3D Blu-Ray player

With LG Smart TV, premium apps, educational games and more this Blu-ray player will aid any library learning environment. Other features include 3D Blu-ray Disc, 1080p DVD Up-scaling and HDMI output.

Product: BP120

LG
Life's Good

Height adjustable trolley

A lightweight mobile cart with a collapsible design, including telescopic height-adjustment and integrated cable management. Screen can be mounted in portrait or landscape orientation and smooth rolling castors give effortless positioning, with two locking castors for secure placement.

Product: MFCUB

CHIEF

Libraries

To manage the huge number of books, barcode, printing and scanning technologies can be used to make the issuing and tracking of items more efficient. For students, libraries can aid study with information screens, wireless connections and multi-function printers that let them print, scan and copy information. Access to the library can also be monitored with passes created by a bespoke card printer.

Cool
Quiet

A4 Colour Scanner

This new product means users can scan straight to a tablet device/wireless enabled PC, making scanning even more convenient. Its unique vertical J-Path design also makes it ideal for placement in libraries or study areas.

Product: 6906B003AA

Canon

Network friendly and fast

With a noise level of just 52dBA while printing, this high performance A4 printer is the ideal choice for silent library study. Eco-mode saves money while network connectivity comes as standard. An efficient mono laser that will deliver professional results every time.

Product: ML-3710ND/SEE

SAMSUNG

Print cost management

PaperCut is the easy way to automatically monitor and manage printing, giving control over costs and environmental impact. The software intercepts print jobs on the print server and analyses them, applying rules to enforce your print policies.

Product: PaperCut NG/MF

PaperCut™

Listen and learn with enclosed dynamic headphones

Students can successfully study in the library with these powerful headphones. Entirely over-ear they reduce sound around the listener. Their compact folding design is perfect for use on the go.

Product: SE-MJ511-K

Pioneer

55-inch full HD LED display

This full HD 55-inch display gives clarity, detail and impact to any presentations and new media. Benefits from DVI, HDMI and RS232 inputs, make it ideal for multi-input applications such as media rooms.

Product: 55WS10

Professional audio solutions

Suited for small audio installations like media rooms, these superb 6.5" woofer loudspeakers with a iWA 1 user friendly volume control and 20W amplifier are from Yamaha's work ProCA range. Offering a sleek affordable design, this audio solution wins plaudits from users, architects and interior designers alike.

Product: WORKAMPCEILING

Compact and capable solution

Compact, fast and affordable A3 colour printer with duplex printing and network connectivity to enhance any creative document. High quality, high volume, print capabilities on-demand and in-house. Don't forget to add your genuine OKI consumables.

Product: 1318803

Versatile stand with sound

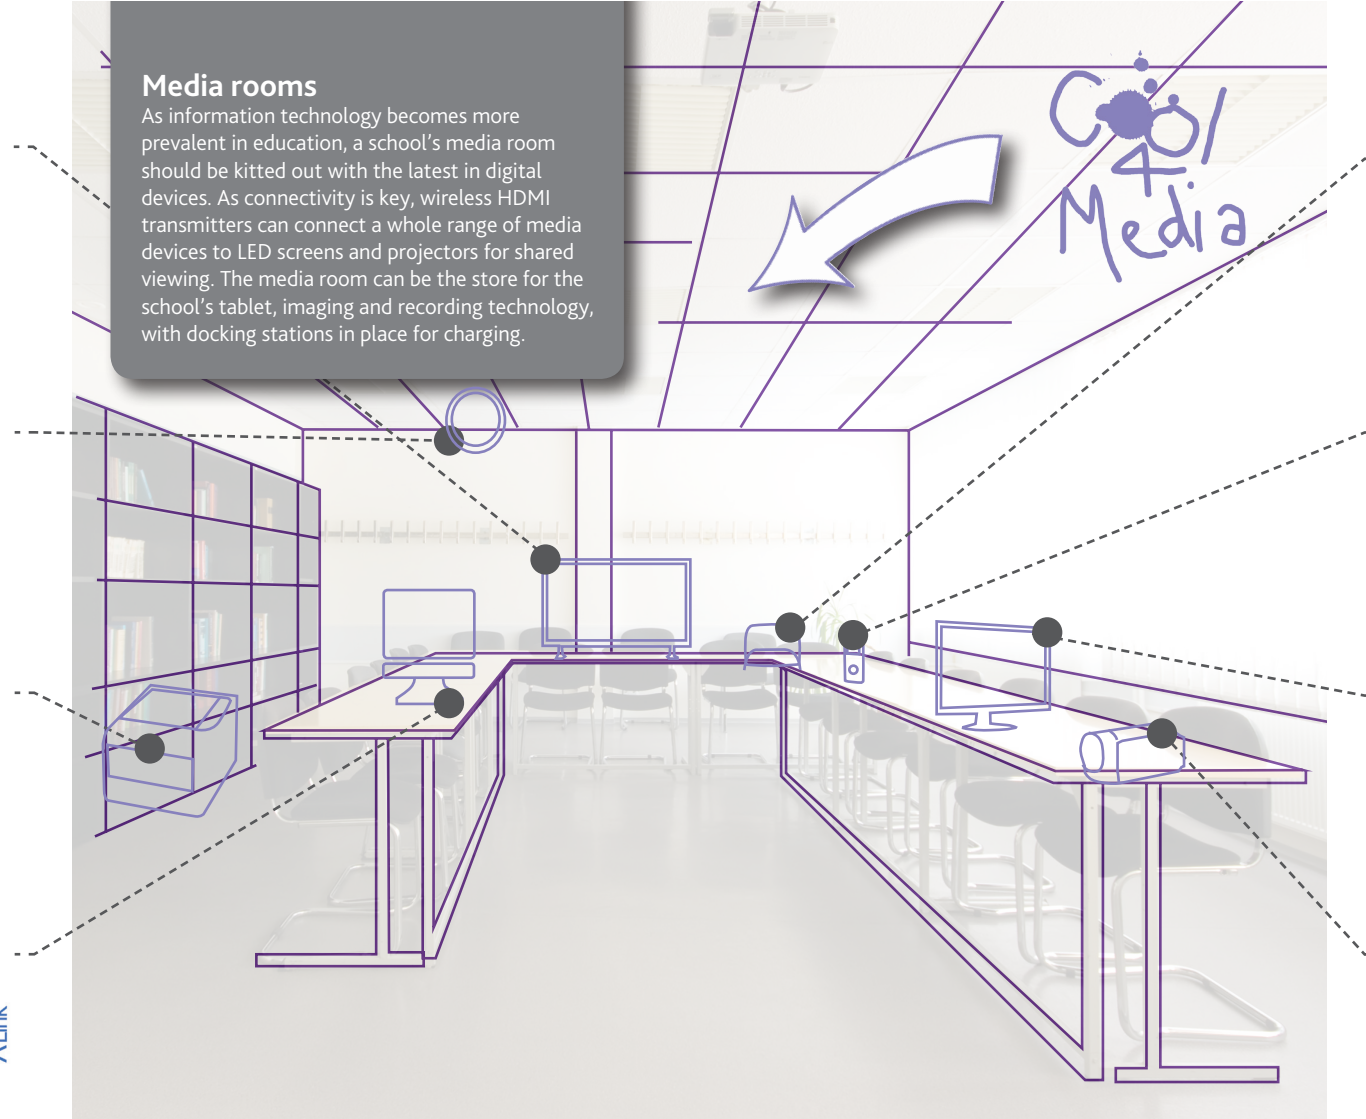

Rotates to support vertical and horizontal applications. Charges and syncs iPad when cradled and keeps it safe and out of harm's way. When associated with the Paddock and an external Bluetooth keyboard the iPad becomes a mini workstation.

Product: VP3650V2

Media rooms

As information technology becomes more prevalent in education, a school's media room should be kitted out with the latest in digital devices. As connectivity is key, wireless HDMI transmitters can connect a whole range of media devices to LED screens and projectors for shared viewing. The media room can be the store for the school's tablet, imaging and recording technology, with docking stations in place for charging.

Share videos and media easily

Connect multiple HDMI inputs from media devices such as Blu-ray players and games consoles to be wirelessly transmitted to a screen which are selectable via IR remote.

Product: WHD6215-GB0101F

Easy recording, easy search, easy playback

Simple voice recorder which maintains the same sense of convenience and ease-of-use of the traditional tape recorders. High-quality audio is provided with the Noise Cancellation and Microphone Sense Setting which allow background noises to be eliminated and stabilises soft or loud sounds.

Product: V412131WE000

24-inch screen ideal for media studies

The 24-inch height adjustable IPS panel will display 1920 x 1200 resolution, perfect for media studies and will flip from landscape to portrait in an instant. An array of inputs including DisplayPort, DVI, VGA and USB connections.

Product: XB2485WSU-B1

Get closer and share in Full HD

Canon's HFR48 camcorder has plenty to boast about, its compact and lightweight body gives your customers the freedom to share with in-built Wi-Fi. Record school productions in both AVCHD and MP4 simultaneously, plus record up to 12 hours due to the 32GB built-in memory card.

Product: 8152B014AA

View cookery demonstrations clearly

Used in conjunction, film cookery demonstrations and feed the images to a local projector to be displayed on screen, enabling the class to view the lesson without crowding around the hob or desk.

Product: GCH-K0323D & GTH-K0010M **GRUNDIG**

Robust and resilient screen

Hardglass screen is virtually impossible to scratch and mark, making it suitable for a cooking classroom environment. Ultra-fast response time of 3ms, slim modern design and convenient VESA compatible wall mounts.

Product: U-23 **Ag neovo**

Interactive visualiser from AVer

Lessons will take flight, as the sharp, vivid imaging achieved through this visualiser's 5-megapixel camera sensor and full HD1080p output spark students' imagination. High resolution images of precious classroom moments can be captured and saved to the internal/external memory.

Product: AVERF15 **AVer**

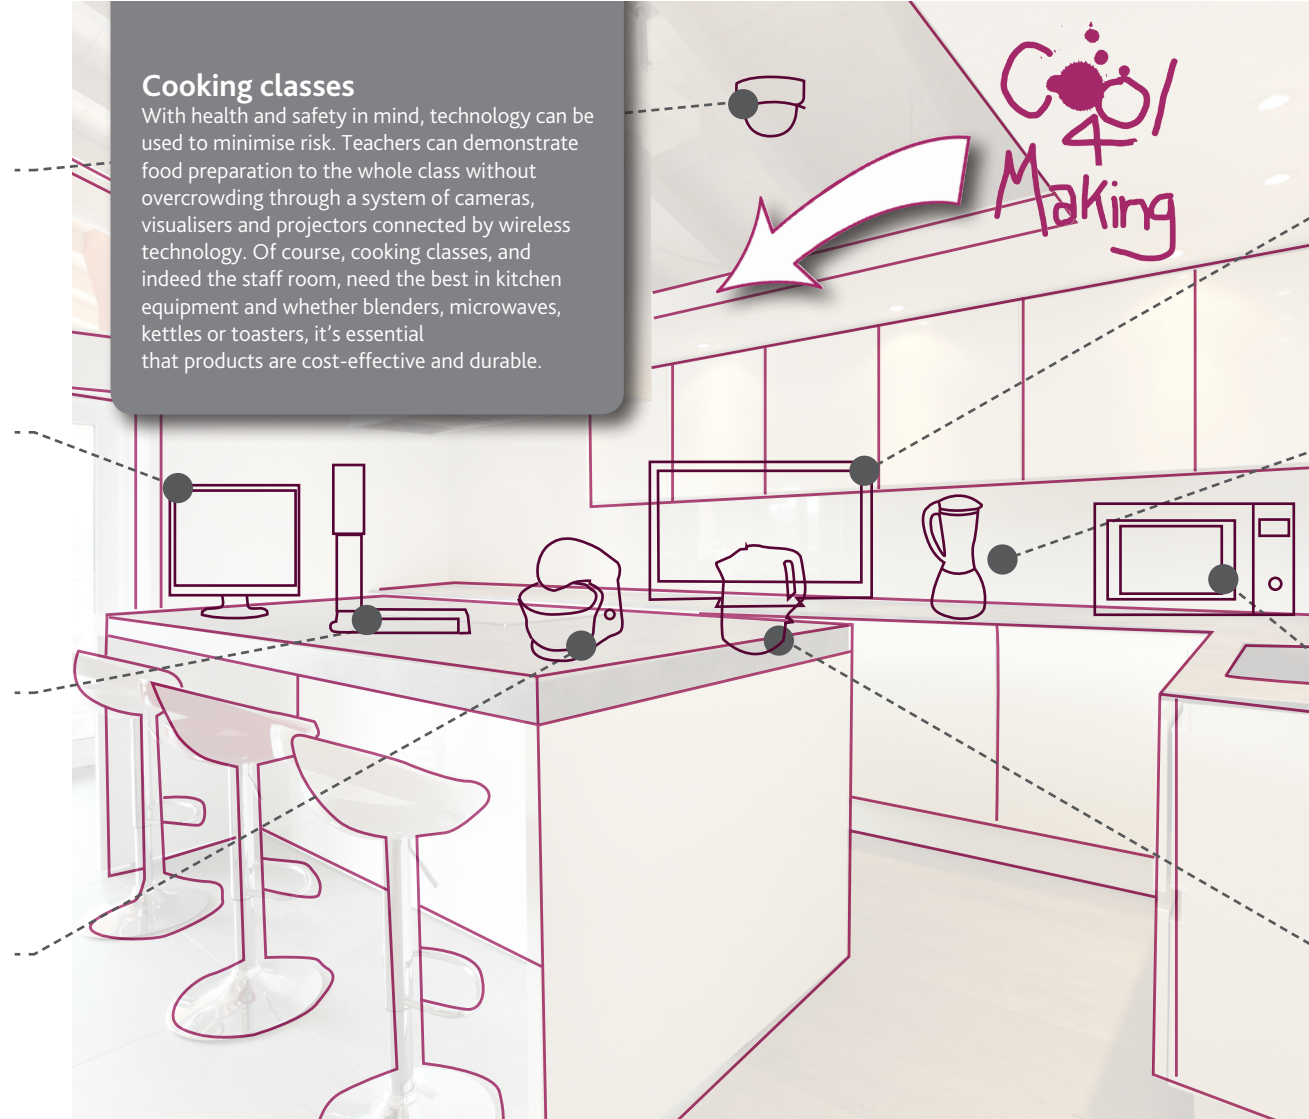

Mix the perfect recipe with folding stand mixer

Ideal for cooking lessons this mixer offers a high quality 3.5 litre bowl and 6 speeds. It folds down to a third of its height, ensuring a space saving fit in the food technology room.

Product: 48992 **morphy richards**
more innovative

Cooking classes

With health and safety in mind, technology can be used to minimise risk. Teachers can demonstrate food preparation to the whole class without overcrowding through a system of cameras, visualisers and projectors connected by wireless technology. Of course, cooking classes, and indeed the staff room, need the best in kitchen equipment and whether blenders, microwaves, kettles or toasters, it's essential that products are cost-effective and durable.

Demonstrate on the big screen

This stunning 70-inch TV offers teachers the ability to show students cooking lesson methodology and give the best possible viewing experience, in 2D or 3D

Product: LC70LE836E

SHARP

Blend ingredients with confidence

As an essential item for cookery this blender features 2 speed settings, pulse rotation, transparent cup included and stainless steel blade.

Product: SP12020N

Swan
designed for life

ELECTRONICS **DE**

Stylish energy reducing kettle

This simplistic kettle allows boiling water to be quickly prepared for cookery projects and offers 1.7 litre capacity, easy-to-read water levels and cord winder for easy storage.

Product: HD4644

PHILIPS

Lightweight and portable projector

With its light and compact design, this ultra-short-throw projector gives an interactive experience on any flat surface. With the bundled wall-mount and optional tabletop kit you can project onto any existing whiteboard, wall or tabletop, with sound coming from an in-built 10w speaker.

Product: CPAW2519NM

HITACHI
Inspire the Next

Science made simple

Celestron's digital microscope replaces the traditional eye piece with a 2.4-inch LCD screen - giving an instant view for several students. It's built-in 3MP camera and SD card slot makes it easy to take images and video and then save them to view later.

Product: 144936

CELESTRON

Multimedia desktop document camera

The Lumens PS750 is a Multimedia document camera with HDMI output, stand-alone audio, video recording and playback. Specifically designed with the needs of teachers in mind, the PS750 works seamlessly with interactive whiteboards.

Product: PS750

Lumens
Brilliance by Design

65-inch touchscreen display

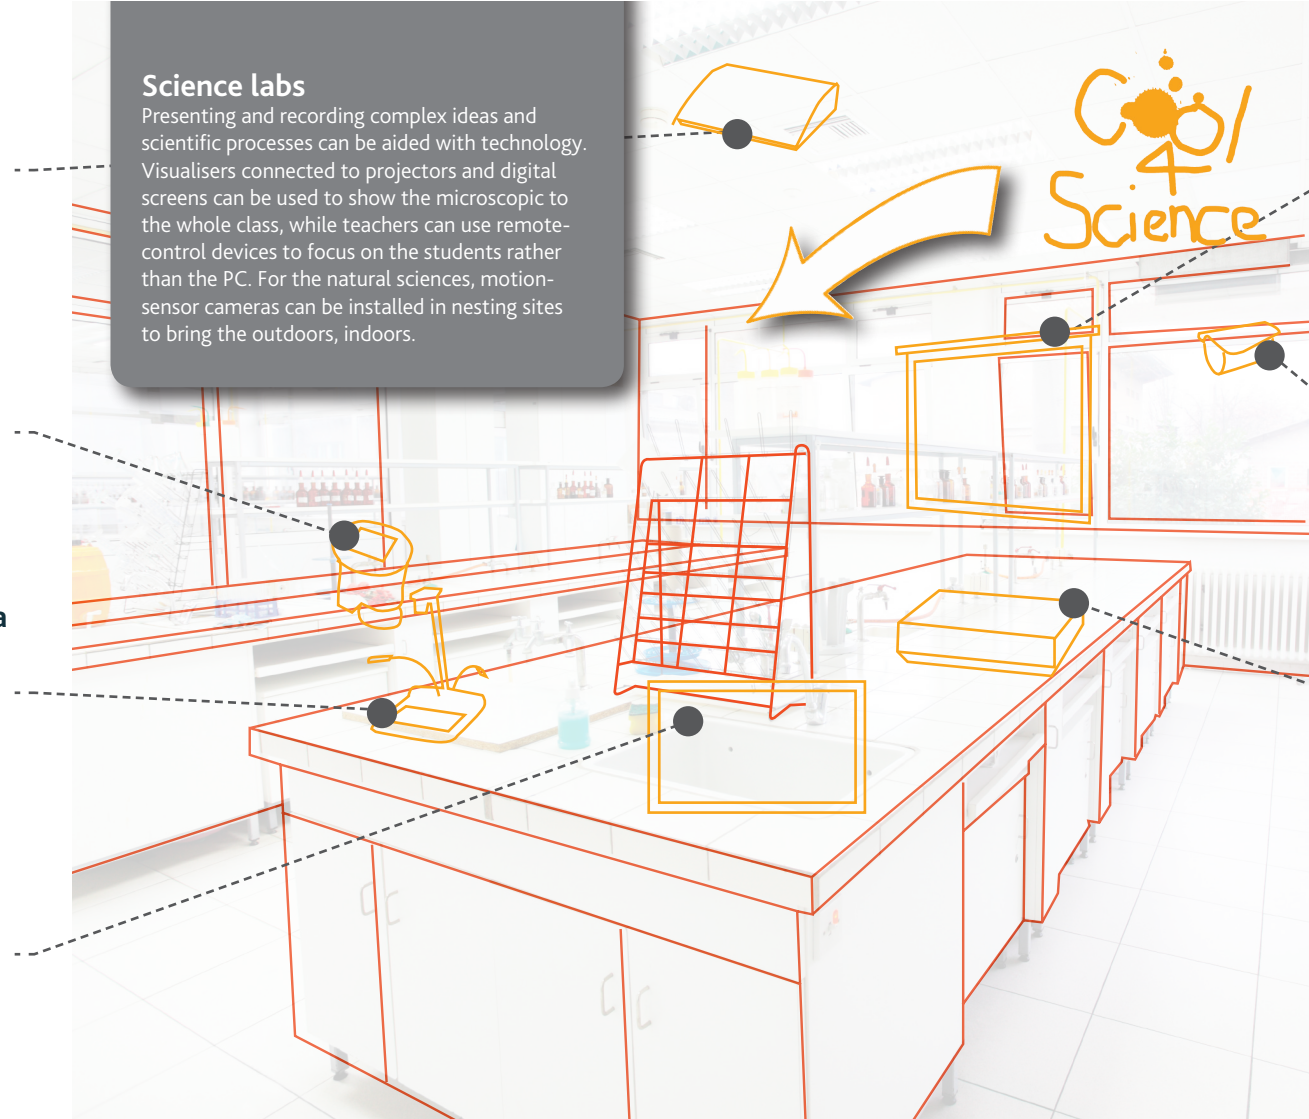

Audience participation is taken to a whole new level with this 65-inch full HD LCD display. This is the ideal interactive solution for a science lab, where teachers can perform experiments using the touch capabilities and even get the students involved.

Product: BDL6545AT/00

PHILIPS

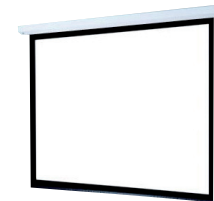

Science labs

Presenting and recording complex ideas and scientific processes can be aided with technology. Visualisers connected to projectors and digital screens can be used to show the microscopic to the whole class, while teachers can use remote-control devices to focus on the students rather than the PC. For the natural sciences, motion-sensor cameras can be installed in nesting sites to bring the outdoors, indoors.

Viewing experience and engagement

It's important to see the bigger picture and there is no better way of conveying that information than with a quality projector screen. Available with either manual or electric operation for ease of use, screen sizes in excess of 3 metres wide are available.

Watch nature in action

Bring nature indoors - watch birds nesting, foxes and other wildlife for nature/science education. Motion detection, built in IR lighting and free recording software makes it possible to view out-of-hours footage.
